

RAGAMAIE NAGINENI

MERN Stack Developer | Backend-Focused Engineer | DSA Enthusiast

 github |  Leetcode |  linkedin |  Portfolio |  ragamaie.n@gmail.com | +91 8522820594

Education

Indian Institute of Information Technology, Sri City
Bachelor of Technology in Computer Science and Engineering

2023 – 2027

Technical Skills

- **Programming Languages:** JavaScript, Python, Java, C, SQL
- **Frontend:** React.js, HTML, CSS, Responsive UI Design
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, PostgreSQL
- **Tools & Technologies:** Git, GitHub, AWS basics, Docker, Swagger, CI/CD Pipelines
- **Core Subjects:** DSA, DBMS, Operating Systems, OOP, Computer Networks, Cloud computing
- **Data Science and ML:** Pandas, Scikit-learn, Matplotlib Data Analysis, Statistical Modelling

Projects

DevLens (Ongoing)

- Building an AI-powered full-stack platform for repository analysis, code dependency visualization, and intelligent impact tracking across large codebases
- Developing scalable frontend and backend modules using React.js, Node.js, Supabase, and PostgreSQL for efficient repository management
- Implemented JWT-based authentication and secure user session handling for protected authentication flows.

DRAKZ – Financial Management Platform

React  | HTML/CSS 

- Developed a scalable full-stack financial management platform using React.js, Node.js, Express.js, and MongoDB
- Built secure RESTful APIs with modular backend architecture and Implemented form validation, authentication workflows for efficient user management authentication flows,
- Configured Docker-based deployment workflows and CI/CD pipelines for maintainable and scalable releases

Hybrid Secure Cloud Storage

- Developed a hybrid cloud storage platform integrating AES-based encryption and AWS services for secure file management
- Implemented secure file upload, encrypted storage workflows, and cloud-based access management mechanisms
- Designed scalable backend workflows to enhance data security, storage reliability, and distributed access handling

UAV-ISAC Optimization

- Developed optimization models for UAV-assisted Integrated Sensing and Communication systems using Python
- Implemented fairness-aware scheduling and multi-objective Pareto optimization techniques for intelligent resource allocation
- Simulated network performance and analyzed power allocation strategies to improve communication efficiency

Experience

Web Development Trainee

Dec 2023 – Jan 2024

- Developed responsive full-stack web applications using HTML, CSS, JavaScript, React.js, Node.js, and Express.js
- Built interactive frontend components and optimized frontend responsiveness
- Designed and managed backend workflows, integrated REST APIs, database operations, and structured data handling for scalable web applications
- Implemented form validation, authentication flows, and error-handling mechanisms

Achievements & Coding Profiles

- Ranked **102/1603** in Aithon Hackathon
- Solved **165+** problems on LeetCode focused on Data Structures and Algorithms
- Active contributor and Core PR Member at Epoch Club
